Environmental tips

Please dispose of the package, used components (battery) and hazardous fluid (antifreeze and machine oil) properly according to local waste disposal regulations to ensure environmental safety and please remember to recycle them for further use if possible.

CLEANING EQUIPMENT OWNER'S GUIDE

MULTIFUNCTIONAL **BURNISHER**

BF517·517A·517B BF519·519A·519B BF521·521A·521B BF522·522A·522B BF520

This manual contains important safety precautions and instructions on the correct operation of product, please read this carefully before using the product.

Operation instructions for multifunctional burnisher

Operation procedure

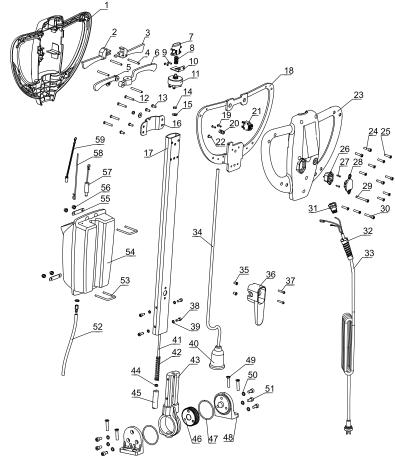

- 1. Mount on brush and pad: hold the operation wand upright and tilt burnisher to load the proper brush or cleaning pad counter-clockwise unto the motor clip.
- 2. Mount water tank on the wand: place burnisher on ground horizontally and keep wand vertical. Loose upper and lower clips of water tank and put the tank onto the wand, adjust the position of the water tank on the wand. Tighten the water tank, then connect one end of plastic pipe to outlet of the tank, and the other end to inlet of the machine base.
- 3. Adjustment of operation wand: put the burnisher on the normal floor, pull up the handle adjustment lever, adjust the wand to a proper working position to ensure erect posture and arm slightly bending when operating. Then loose the handle adjustment lever, and wave the wand to check if the operation wand is locked correctly by adjusting gear.
- 4. Load water (cleanser): Load water or cleanser into water tank according to cleaning demand.
- 5. Wire connection: Connect base wire to the power coupler of wand, loose wire of wand, check to ensure the voltage identical with the rating voltage, then connect the power cable into the socket.
- 6. Power operation: power is controlled by left and right switch lever. For the sake of safety, the startup switch lever work jointly with the safety interlock lever, push the safety interlock lever from the middle to the bottom while pressing the switch lever. Loose the safety interlock lever after the burnisher startup.
- 7. Direction control: after the burnisher startup, pull up or press down the wand slightly, the burnisher will move to right or left automatically. Press down the wand will increase the hind pressure of the drive plate, thus make burnisher move to left. Pull up the wand will increase the fore pressure of the drive plate, thus make burnisher move to right.
- 8. Water flow control: When water is needed pull up the fluid control lever and loose it to stop water flow.
- 9. Job completion: disconnect power, empty water in tank and clean tank when with clean water. Unload brush or pad for cleaning.

• Safety rules and attentions:

- 1. Before operation, please read this manual carefully in order to ensure operating this machine correctly. If any questions, please contact the local sale agent for further information.
- 2. Please check to ensure the power voltage identical with the rated voltage marked on the nameplate before connecting the power cable. Pull out the power plug while not in use and wire the power cable properly.
- 3. Check to ensure the power cable undamaged before using. If the power cable was damaged or the instrument fault, let a maintenance man from the shop or similar specialist change or repair, to prevent unfavorable result. Never use the spare parts from other company, otherwise, we don't take on responsibility.
- 4. Don't use the machine outdoors while raining in order to avoid short circuit and the electric shock accident. And keep it in dry place while not in use.
- 5. Make sure power cable is clear from any heavy body upon it. Plug out power before any maintenance and cleaning.
- 6. Before cleaning carpet, please moisten carpet with water of cleanings to lessen cleaning resistance for the machine.
- 7. This appliance does not intend to be operated by weak, dull or psychotic individuals unless they are under correct directions or assistances from ones with responsibility for their safety.
- 8. Children should be supervised strictly to ensure that they always keep away from this appliance.
- 9. This machine is suitable for hotel, office, and warehouse.
